

Answer This Month's Question
For a Chance to Win!

Business Phone Technology can be Stressful:

With technology changing all the time; empty promises from companies, poor service, and bills that are not understandable it is easy to be confused and frustrated.

These issues are not acceptable and you should not have to tolerate it. I make it my business to be the best in phone technology and help people get the right technology they need.

My name is Roy Lukowski and I can Help your Business!

From IP Phones delivering Voice over Internet / VoIP, to traditional PBX systems, I would love to be able to help you out with your phone technology and I will be trying to get out some up to date information and make some suggestions on my Blog. If you are interested in getting some helpful info please [check out my Facebook](#) page for TBS Phones for all my latest posts, phone system reviews, and more.

In order to get to know you better, so I can help you find the best phone system, please fill out the survey below. Each month we'll draw a new winner for a \$25.00 gas card. This drawing ends on 1/31/2012.

**Does your business currently use an IP
If yes are you satisfied with the**
